Curriculum Vitae

Mukaramatu Umar Farouk.pdf

Career Goals

443/1000 chars

My purpose for applying to graduate school is to both expand on my existing knowledge of clinical biochemistry and to create additional opportunities for myself in the near future. I believe that graduate school will prepare me for a successful and challenging career in the use of modern clinical equipment.

It is my dream to divert into academia after successfully completing my course, and also after gaining a PhD in related discipline.

Additional Information to Support Application

635/1000 chars

The importance and relevance of biochemistry related disciplines to the modern world have led me to want to pursue the study of clinical chemistry at a higher level.

In 2013, I was admitted into the University for Development Studies, during my study, I was taken through a number of concepts and among them was the synthesis, extraction, purification and re-crystallization to obtain very pure compounds. Interestingly, my dissertation was on the production and characterization of microcrystalline cellulose from teak green leaves and teak leaf litter, which can be used in pharmaceutical and cosmetic industries as excipients.

Course Specific Questions

Medical Science - Clinician You are a current clinician and will be returning to clinical duties after your course.

Application Information

Academic Awards

No awards entered

Employment History

Sep 2018 - Dec 2019 Research Assistant

West African Centre for cell Biology of Infectious Pathogens (Accra, Ghana)

Other Applications Made

No other applications entered
